**Tuesday,
July 29, 2014**

1:30 – 3 p.m.

Sponsored by:

alzheimer's association®

**Aging Services
of Minnesota**

LEADING CHANGE ■ CHANGING LIVES

Module #8 –
The Legal Aspects of Decision-Making
Webinar – Tuesday, July 29, 2014 • 1:30 – 3 p.m.

Purpose

A lifetime of decision-making continues even through late stages of dementia. Preferences about food, activities, what clothing to wear, when to get out of bed, etc. are still expressed. At some point in time however, the person with dementia lacks the capacity to make higher level decisions relating to care. Learn about who can do so legally and when.

Learning objectives

- Learn how capacity and incapacitated person is defined by law.
- Review substitute decision-making for persons with dementia – who can legally make what types of decisions for them.
- Learn about tools and options for recognition of a surrogate decision maker for an incapacitated person.
- Identify the policies and procedures that will assist your organization in the area of decision-making.
- Understand the Minnesota POLST order form and its importance as a health care decision-making tool for persons with dementia.

Suggested audience from care centers, AL/HWS settings and adult day services

Direct care staff responsible for leading or training peers in dementia care; nurses; dementia program directors; and other staff interested in the topic

Faculty

BARBARA J. BLUMER, Attorney, Blumer Law, Eagan; and **JOYCE M. KONCZYK**, LSW, Volunteers of America-Minnesota, Minneapolis

CEUs

This educational program has been designed to meet the continuing education criteria of the Minnesota Board of Nursing. Application is being made to the Minnesota Board of Examiners for Nursing Home Administrators for clock hour credits. Aging Services of Minnesota is an approved continuing education provider by the Minnesota Board of Social Work. General certificates of attendance will be issued, provided the CEU requirements are met and can be used by individuals to submit their own request for approval.

How CEUs are earned

Anyone wishing to earn CEUs for each program module in the series (webinars and workshops) **must** complete a post test for the program and earn a score of 70% or more. The post test will be sent to the organization's webinar contact person following the webinar. Once the post test is completed, information on how to access the certificate of attendance will be sent to the individual requesting it.

About the Dementia Care Certificate

Participants who successfully pass all the post tests from the 12 modules of the training will earn a **certificate of completion** – which demonstrates in-depth professional study of a particular topic area on a voluntary and individual basis. **It does not denote certification or that someone is “certified” in dementia care.** Questions on this may be directed to Heidi Simpson, Vice President of Education, Aging Services of Minnesota, hsimpson@agingservicesmn.org. Detailed information about the program's CEU requirements may be found on Aging Services' website and under the program's information on the Events page at www.AgingServicesMN.org.

About the Series

As the number of older adults with dementia needing care increases, so does the need for well-trained caregivers who understand the unique aspects of their disease and have the skills and knowledge to respond to their needs. This comprehensive educational program series is designed to improve the quality of the care given to persons with dementia. It consists of 12 different modules – nine webinars and three one-day hands-on workshops. It can be attended in its entirety to earn a certificate of completion or individually for topics of specific interest. It is also designed for a variety of audiences within the aging services provider continuum in Minnesota's care centers, adult day services and AL/HWS settings.
